ZVOX®

Great Sound Made Simple

Home Theater Simplified. But Not Tamed.

What The Critics Say About ZVOX Surround Sound Systems:

"The best I've heard."

MSNBC

"Remarkably ingenious."

Sound + Vision

"Outstanding Sound Quality."

Home Theater

"Blows away TV sound."

NBC's Today Show

"Amazing...shockingly good."

Home Entertainment

"Audiophile-quality."

Stereophile

"Far ahead of competitors."

CNET

"Sounds bigger, not just louder."

The New York Times

Awards Given To ZVOX Sound Systems:

The new ZVOX Z-Base 555 delivers high quality surround sound with no external speakers.

Forget everything you know about surround sound. Now you don't need a roomful of speakers and wires to get great home theater sound. The new Z-Base 555 includes five speakers, a powered subwoofer, amplifiers and PhaseCue™ surround sound – all in one cabinet, with one connecting wire!

Sits under your TV – no mounting brackets or special cabinets required. Simply place the Z-Base 555 on a piece of furniture, then place your flat-panel TV on top of it. Because it's only 28" wide and less than 3.5" high, it will fit just about anywhere. Once installed, most people won't even notice it – until they hear it!

Award-winning ZVOX sound quality. We don't know of any company whose sound systems have gotten more rave reviews in the last five years. The critics – and our customers – love ZVOX systems. Voices are clear and understandable. Movie soundtracks come alive with 3D sound and powerful bass. Music is remarkably accurate and lifelike. You simply won't believe how much sound can come from such a compact system.

► Works with your remote.

The Z-Base 555 is programmed so that it can learn the volume, mute and on/off commands from your TV or cable box remote control. So after you've set up the system, you can put the ZVOX remote in a drawer.

► **Super-clear voices.** Our new Dialog Emphasis feature makes voices crystal clear – you can hear every word.

► **Sound volume leveling.** Our new Output Leveling feature helps keep volume at the same level as you go from channel to channel, or when a commercial comes on.

► Improved sound quality and bass.

We employ advanced electronic contouring techniques to improve midrange accuracy and bass output in the ZVOX 555. It sounds fantastic!

► **"Green" design – less than 0.5 watts in standby.** High efficiency digital amplifiers mean the 555 uses very little power when in use – and less than 0.5 watts in standby.

► **Connect your iPod® too.** The 555 has multiple analog and digital inputs – including a mini-jack input

on the front panel that allows you to quickly plug in your iPod or other portable sound system.

► **Big under-grille display.** Our new display is cleverly hidden beneath the speaker grille – and disappears when you're not using it.

► **Specifications.** 28" w x 14" d x 3.5" h. (5) 2" full-range speakers, (1) 5.25" woofer. Optical and coaxial digital inputs, plus (2) analog inputs on rear panel. (1) 3.5mm stereo input on front panel.
