The Chicago Tribune

*“The best I’ve heard. Knockout sound.”*  
MSNBC

*“The sound is enormous.”*  
PC World

*“Clear, powerful...the Mini offers outstanding sound quality.”*  
Home Theater

## “Simply Amazing.”

about.com

The ZVOX Mini is a revolutionary single-cabinet audio system for use with your iPod®, portable CD player, MP3 player, PC, TV or game console. It is small. It is simple. It is affordable. But most importantly, it sounds unbelievably good—and unbelievably “big.”

### Say Good-bye to Low-Quality Sound.

Up till now, most sound systems designed for use with iPods have put all the focus on size and style, and none of the focus on sound quality. And until now, sound systems that integrate visually with LCD TVs have been virtually nonexistent.

We’re going to change that. The ZVOX Mini employs high-quality speakers, a built-in powered subwoofer and our PhaseCue™ virtual surround sound system to create lifelike, realistic, room-filling sound—including great bass. It delivers “big system sound” from a single cabinet not much bigger than a laptop computer.

### Fits Anywhere, Goes Anywhere... Its a PortaParty!

The ZVOX Mini can fit just about anywhere. You can even take it on trips with our optional PortaParty™ carrybag. The PortaParty has pockets to hold up to four different audio/video devices—like iPods, miniature MP3 players, portable CD players or portable DVD players. You can feed the signal cord through a built-in slot to the ZVOX Mini and play the system while it’s “in the bag.”

ZVOX PortaParty Bag .....\$49.99
